

Lista motorizărilor cu injecție directă ce pot fi echipate cu Landi Renzo Omegas Direct

Sistemele GPL din gama Omegas Direct funcționează în regim dual prin asigurarea unei adiții de benzină în anumite regimuri prestabilite de către producătorul Landi Renzo.

Proporția de carburant benzină utilizat variază între 10-30% în funcție de regimul de exploatare.

Există posibilitatea ca la ralanti unele autoturisme să funcționeze pe benzină.

Componentele din căsuțele marcate cu galben se vor achiziționa obligatoriu împreună cu sistemul GPL. Fără aceste componente nu se va putea obține o funcționare corespunzătoare pe GPL.

Recomandăm ca înaintea montajului să se verifice funcționarea

corespunzătoare a motorului și a sistemelor anexe.

Recomandăm ca înaintea montajului să se verifice spațiul disponibil pentru montajul rezervorului de tip toroidal interior/exterior sau cilindric.

Importatorul Proeco Gas Systems își rezervă dreptul de a face modificări fără o notificare în prealabil !

Prețurile din aceasta anexă sunt exprimate în EURO, nu conțin TVA, și se facturează la cursul BNR din ziua respectivă.

Lista motorizărilor cu injecție directă ce pot fi echipate cu Landi Renzo Omegas Direct

update 10 noiembrie 2018
